A HUF 2,000 administration fee is charged per order, regardless of order volume.**

Compact Cocktail without compromises!

Our current selection includes 3 types of cocktails: **Aperol Spritz, Mojito, and Pornstar Martini**. Upon request, we create unique signature cocktails (subject to minimum production quantities)

- **CoCo Cocktail**
 - We use premium spirits and ingredients for production.
 - Instead of artificial flavors, we work with real fruit purées, herbs, and high-quality natural extracts.
 - CoCo provides the same quality as traditionally prepared drinks in premium cocktail bars.
- **Consistent Premium Quality:**
 - No more forgotten ingredients or fluctuating quality – the experience is the same for every guest.
- **Cost-effective and Sustainable:**
 - No need for expensive, highly skilled labor or a massive staff.
 - With CoCo, raw material waste and spoilage can be reduced to zero.
- **Plug & Pour System**
 - The technical background is easily provided and accessible to anyone.
 - Cocktails can be dispensed using a classic beer tap system; only an "F" type KeyKeg coupler and standard cleaning equipment are required.

Packaging: 12L PolyKEG

- **How is it packed ?**
 - Unlike traditional metal kegs where gas directly contacts the beverage, the PolyKeg uses a "bag-in-keg" system where the liquid is held in a special, multi-layer sterile bag inside the plastic keg. One 12L PolyKeg provides approximately **72–75 servings**.
- **Why is the "bag-in-keg" solution beneficial?**
 - No contact with propellant gas: The gas (CO2 or compressed air) only squeezes the bag from the outside. The cocktail does not carbonize further and does not oxidize.
 - Can be tapped with compressed air: Since the gas never touches the drink, a simple compressor can be used instead of expensive CO2 or Nitrogen tanks.
 - Longer shelf life: Once opened, the cocktail stays fresh for weeks because the bag shrinks and prevents air from entering.
- **What to do after use? (Recycling)**
 - Depressurization: After use, the remaining gas pressure must be released using the small red valve. Once the pressure is released, the keg can be compressed relatively easily.
 - Selective Waste: The PolyKeg is made of 100% recyclable plastic, so it can be placed in selective waste collection bins.

Storage and Shelf Life

- **How long does a keg last?**
 - Unopened: A minimum of 12 months from the date of production.
 - Once opened: 2–3 weeks. Since the propellant gas (whether CO2 or compressed air) never comes into contact with the cocktail and only compresses the inner bag, no oxygen reaches the beverage.
 - It is important that the tap head and lines are kept clean and regularly maintained.
- **How should the kegs be stored?**
 - The wall of the PolyKeg is equipped with a special UV filter and oxygen barrier, ensuring the cocktail does not oxidize or lose its aroma during storage. However, it is recommended to store them in a dry, cool place protected from direct sunlight.

Delivery & Logistics

- Delivery within Budapest: Free of charge for orders of at least 1 keg.
- Countrywide delivery: For locations outside the capital, we work with partner carriers under individual arrangements.
- Personal pickup: Kegs can also be collected in person during opening hours at our location on Soroksári út, Budapest.

Service and Preparation

- **What expertise is required??**
 - None – it works exactly like pouring a beer.
- **How much faster is it?**
 - A tapped cocktail is ready in about 10–12 seconds, compared to the 2–3 minutes required for traditional preparation.
- **How large is one serving and what is the alcohol content?**
 - Serving size: 160 ml – exactly as a bartender would prepare it, including the necessary dilution.
 - One 12L PolyKeg provides approximately 72–75 servings of cocktails.
 - Alcohol content: Between 8–10% ABV, which is exactly the same alcohol content as the traditionally prepared versions of these cocktails.
- **Legal Compliance**
 - Our products fully comply with all current legal regulations and are always issued with the legally required tax certification marks (excise stamps).

Who do we recommend it to and why?

- **High-traffic venues (clubs, terraces, festivals, boats):**
 - Reduced queuing and waiting times.
 - Increased efficiency: Serve more guests in less time, resulting in a faster-paced bar and visible profit growth even during peak hours.
- **Restaurants, hotel lobbies, cafes, and smaller outlets:**
 - Premium selection without a specialist: Expand your menu with premium cocktails without the need to employ a professional bartender—providing an extra experience for guests with zero extra effort.
 - Simplified inventory: Easier stock control and ordering.
 - No expertise required: Anyone from the staff can serve a perfect, fresh cocktail with a single motion.
- **Catering and events:**
 - Rapid deployment: Quick setup, easy preparation, and minimal staffing requirements.
 - Self-service option: Can even be deployed as a self-service tap, allowing guests to "pour the experience" for themselves.

**Thank you for your trust, we look forward to our
first successful collaboration!**
